## BEYOND AESTHETIC SURYA UNIVERSITY AS SUSTAINABLE SYSTEMS

### SMART PLANNING

Selagi sebuah kawasan yang holistik, masterplan Surya University dirancang dengan mengadopsi prinsip "walkable center" dimana semua zona aktifitas ditaruh di dalam 3 kluster ring dengan diameter penerusan wilayah kurang dari 1km (hanya 800m bentang). Pembagian ring juga memungkinkan terjadinya "fluid cross-over" antar pilihan moda transportasi publik dan priwat. Dengan mengadopsi sistem efficient-planning ini, 60% lahan dari site nantinya dapat digunakan sebagai Lahan Terbuka Hijau (LTH), dengan rincian 20% didalam Outer Ring sebagai Tamans Universitas, dan 40% di dalam Outer Ring sebagai Surya Forest.

### SYSTEMATIC PROGRAMMING

Class Cluster sebagai zona yang menampung mayoritas aktifitas didirangkan menggunakan satuan kunitifit yang sistematis dengan perhitungan sebagai berikut:

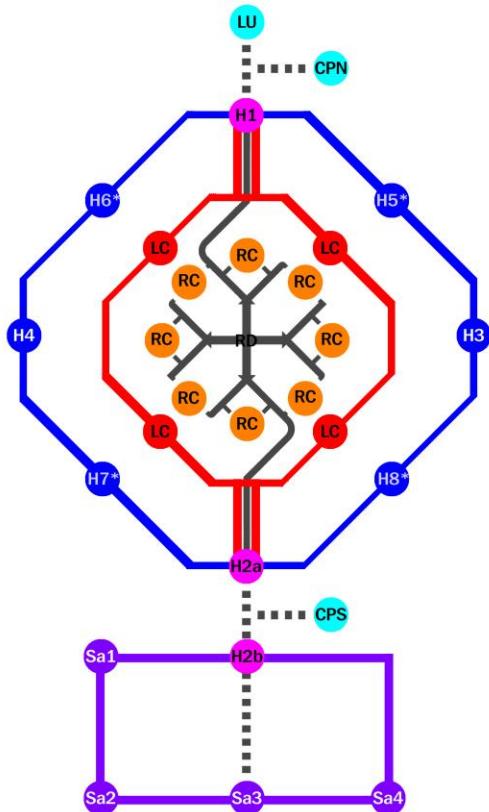

1. Setiap 6 kelas membentuk 1 SET kelas yang memiliki 3 konfigurasii kelas yakni (i) sistem 6 kelas besar (kapasitas/kelas = 40 seats), (ii) sistem 3 kelas besar (kapasitas/kelas = 96 seats), dan (iii) sistem 1 kelas standard (kapasitas/kelas = 304 seats)
2. Setiap 18 SET kelas membentuk 1 CLUSTER fakultas (kapasitas total/fakultas = 5.472 seats)
3. Terdapat total 8 CLUSTER fakultas yang kesemuanya terhubung dengan sistem Light Rapid Transit (LRT) tertutup (closed circuit) (kapasitas total kelas = 43.776 seats).

### INOVATIVE ICONS

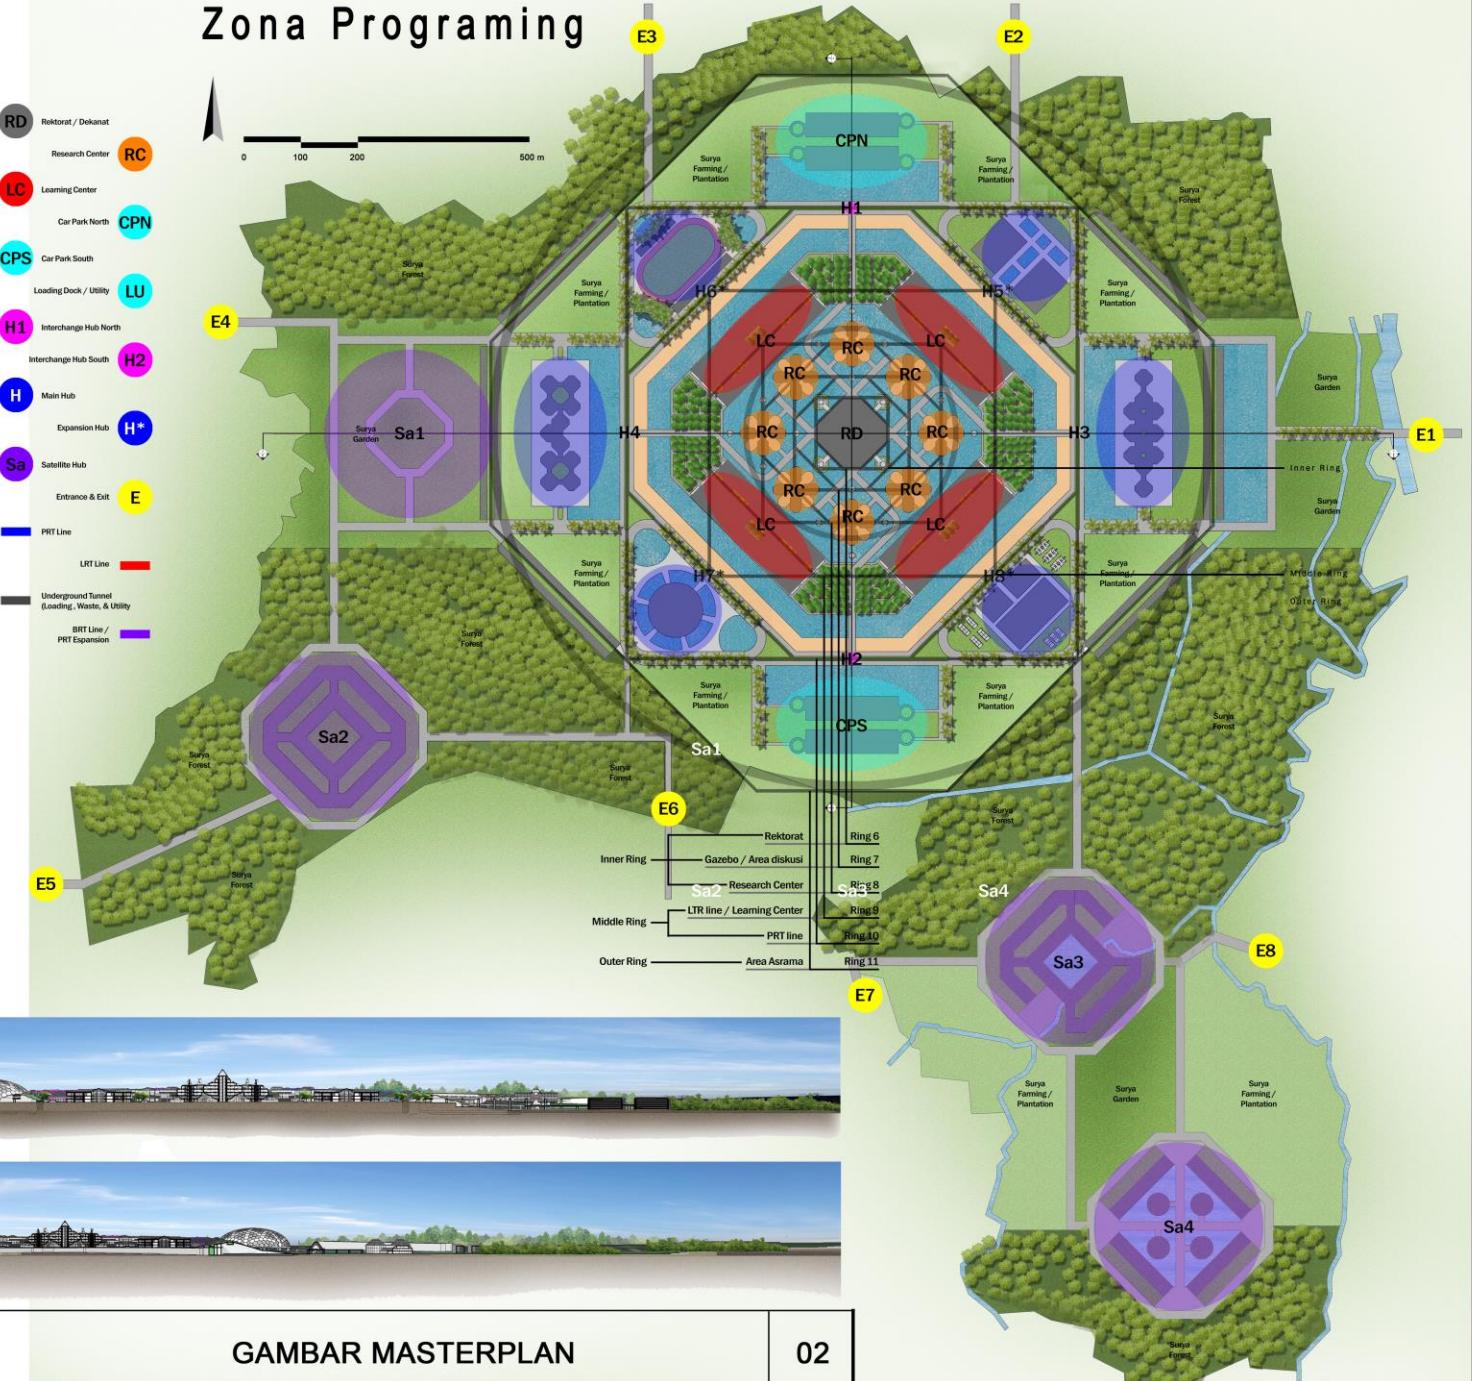

Terdapat 2 modifikasi sistem bangunan yang telah dipersiapkan:

1. Research Centers. Dengan mengadopsi C-Octagon 3 lantai yang sama, kami memilih untuk membuat 3 konfigurasii kelas yakni (i) sistem 6 kelas besar (kapasitas/kelas = 40 seats), (ii) sistem 3 kelas besar (kapasitas/kelas = 96 seats), dan (iii) sistem 1 kelas standard (kapasitas/kelas = 304 seats)
2. Gedung Rektorat & Dekanat. Dirancang masih mengadopsi sistem Ring 1-6 yang sama namun dengan configurasi berbeda dengan memperkenalkan inovasi struktur deifying gravity yang unik oriinal danberkelas.

Skin-based building (Zaha Hadid)

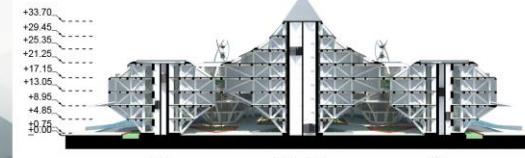

Shell Structure building (OMA)

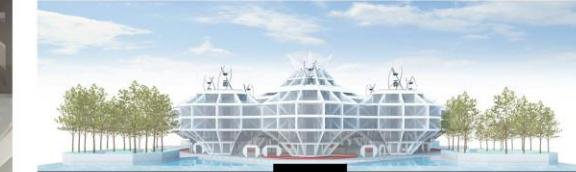

**CHARACTER IMAGE**

Sebagai gedung utama di dalam kompleks universitas, Gedung Rektorat mengembangkan misi penting dalam membawa Character image dari Surya University. Namun sejauh mana Surya University siap untuk mengembangkan image ini? Apakah kulit (skin) bangunan sudah cukup untuk merepresentasikan ke-advance-an Surya University? Pertanyaan ini perlu dijawab untuk mendefinisikan visi 'futurism' yang secara arsitektural ingin diterjemahkan.

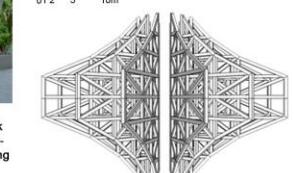

Dewasa ini ada banyak bangunan-bangunan di negara maju yang menampilkan fasade futurism dengan gubahan-gubahan kulit dan atau bentuk yang dinamis, namun sebenarnya secara struktural kebanyakan bangunan-bangunan Skin-based tersebut masih mengadopsi sistem struktur Rigid-frame yang konvensional, atau semacam visioner secara tampilan namun usang didalam...

Bertani diatas Research Center. Memaksimalkan lahan Inner Ring yang terbatas dengan memodifikasi konfigurasi desain bangunan.

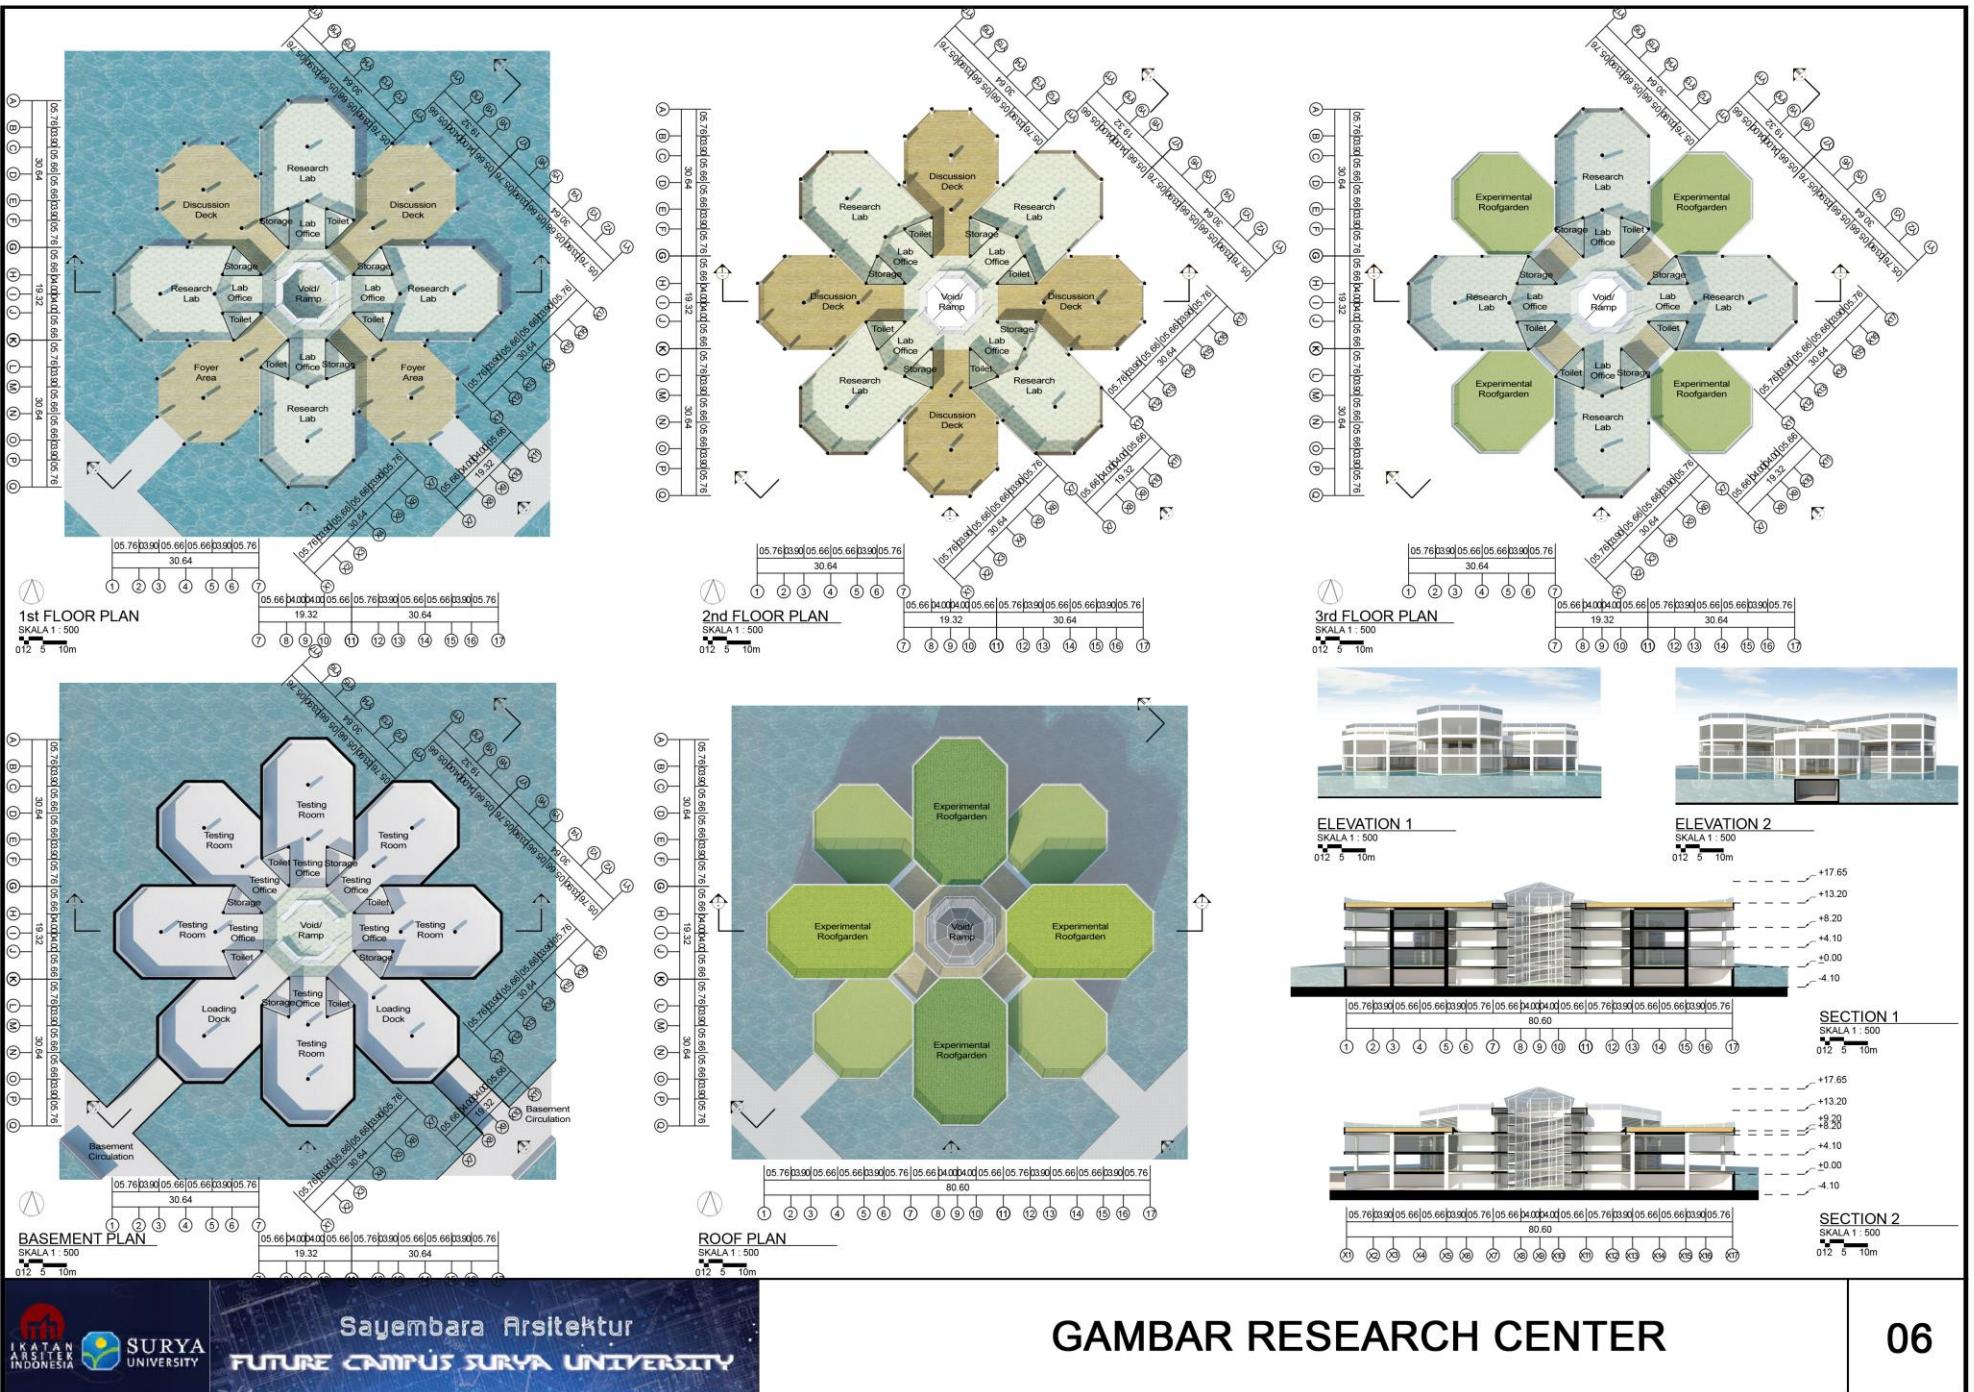

Menggunakan konfigurasi M-Octagon yang sama, Research Center di re-konfigurasi dengan memutar titik tengahnya 45 derajat. Proses ini menghasilkan desain baru dengan luasan roofgarden diatas dan sheltered deck dibawah dengan total luasan 2 kali lipat dari desain aslinya.

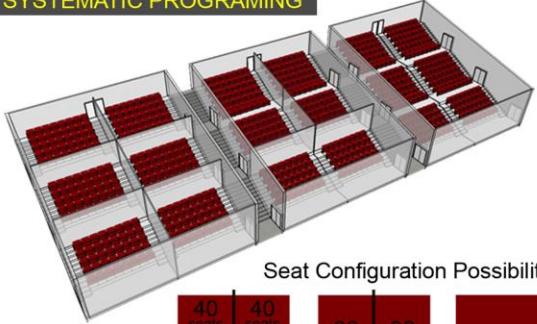

Roofgarden menjadi bagian penting dari Research Center bukan semata karena faktor ekologis atau rekreatif, tetapi lebih dari itu, penggandaan luasan roofgarden membuka kemungkinan riset botani tepat diatas laboratorium research center-nya. Mempermudah pola sirkulasi, men-efisiensikan proses kerja, sekaligus mengamankan produk riset unggulan.

Research Center yang dikelilingi oleh air dan lansekap roofgarden, menetralisir kepentingan aktifitas riset di pusat universitas.

**CATATAN:**

- 1) Perhitungan diatas hanya mencakup gugus bangunan utama di Inner Ring + Learning Center (belum termasuk bangunan-bangunan sekunder dan gugus Outer Ring), atau yang semua yang ada di "dalam" m-octagono.
- 2) Perhitungan diatas belum termasuk paket sistem transportasi publik (PRT, LRT, BRT).
- 3) Perhitungan diatas juga belum termasuk paket instalasi high end IT system dan atau advance integerator-nya
- 4) Paket pekerjaan struktur memiliki range pembayaran yang sangat variatif dikarenakan adanya penggunaan sistem struktur bangunan yang berbeda-beda;
  - Semua basement menggunakan sistem Reinforced Concrete.
  - Bangunan Rektorat menggunakan sistem Single Core Reinforced Concrete + Steel Web Truss.
  - Research Center menggunakan sistem struktur Concrete Rigid Frame
  - Learning Center menggunakan sistem struktur Steel Truss konvensional
